## Alaskan Log Accommodations

Your home base for  
great Alaskan  
**Adventure**

## WISE OLD HUNTER LODGE

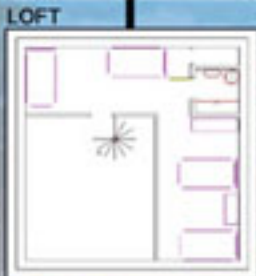

A unique & comfortable log building that features some of Alaska's most prized big game trophies. The 1st floor has a full kitchen, dining and den areas, bedroom with two twin beds, and bath with shower/tub.

The spiral stair leads to the loft with four twin beds and a half-bath. The north room is closed in by log and glass and includes an additional table and chairs plus a trundle bed.

The large BBQ deck is a few steps down from the open south porch and features a split-log bar. It is a great place to relax and watch for moose, eagles and other wildlife. Sleeps eight.

## MOOSE CABIN

This is a single floor, log building with a combined kitchen and den and separate dining area. The cabin has four twin beds located in two separate areas. The BBQ area is on a lower deck and is a great place to relax and watch for birds and Alaska wildlife. Moose cabin was so named because it is located on a well used moose trail that leads through the spruce.

**THE CABINS AT BEAR PAW ADVENTURE** are real Alaska log buildings constructed of fully-scribed logs. Heating is provided by energy efficient oil-fired heaters. Both have satellite TV. The Wise Old Hunter Lodge has an on demand oil-fired water heater so you won't run out of hot water. Both buildings are equipped with dishes, flatware and pots & pans plus most of the basic supplies and staples for cooking. Gas grills are also provided on the BBQ decks. The cabins are located in the spruce trees and wild flowers across the road from Cook Inlet.
